

# XPLM Bulk Loader

The flexible solution for migrating large amounts of CAD data into Oracle Agile PLM

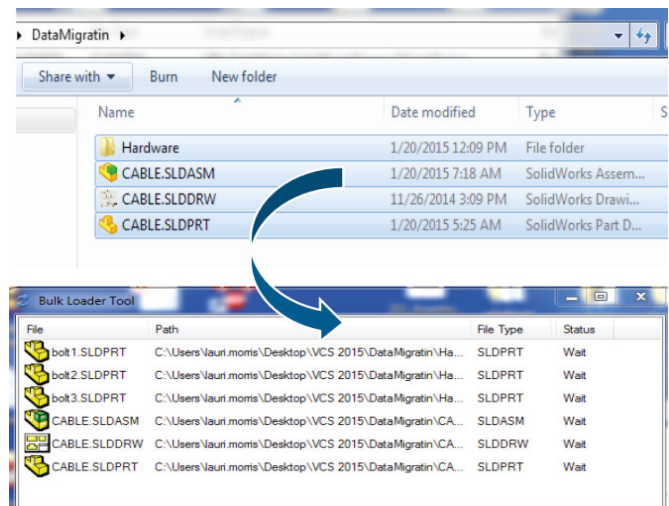

Powerful and easy to use, the XPLM Bulkloader application offers extensive configuration options to meet customer-specific requirements.

Separate configuration settings of the Bulk Loader allow you to load different CAD data types.

By combining PLM process extensions together with the XPLM Bulkloader, it is possible to “clean-up” dirty data at the same time it is being migrated.

## Main Features

- Bi-directional parameter transfer ensures continuity between PLM metadata and the associated CAD files
- Provides support for design files and directory structures
- Complete data collections can be migrated quickly and easily
- Graphical user interface with simple drag and drop function
- Parallel execution for acceleration of loading process possible
- Typically used in conjunction with the XPLM CAD File Analysis Tool
- Controlled metadata export via queue is possible

## Supported CAD Systems

- AutoCAD
- Catia
- Creo Parametric
- Inventor
- Siemens NX
- Solidworks
- SolidEdge
- Others on request

XPLM is an Oracle Gold Partner, providing superior CAD and PLM integration solutions for Agile 9 systems. Together with Oracle, XPLM established the “Joint Competency Center for CAD Integrations” (J2CI).

## About XPLM

XPLM is a German IT company with a subsidiary in the US. XPLM develops integration solutions between leading PLM, MCAD, ECAD, SysML, ERP, DMU, Publishing, MS Office and data exchange applications. The service portfolio ranges from the analysis and definition of PLM business processes to planning and executing implementations, data migration, training, and operational support. XPLM customers include international companies from the automotive, machine and plant aerospace industries.
